PARTS & FEATURES

BEFORE FIRST USE

USING YOUR RAPID EGG COOKER

SOFT, MEDIUM, AND HARD-BOILED EGGS:

Below are guidelines for appropriate cook times for cold large eggs—extra large or jumbo eggs may require additional water and time to achieve desired results.

This Egg Cooker is equipped with a precision thermal sensor. When it senses that all water has evaporated from the Heating Plate, the Cooker will stop cooking, and a music chime will sound to alert you that the eggs are done. Press the power button to silence the chime then remove eggs immediately to prevent overcooking.

If you live at a higher altitude, add up to 25% more water to your Egg Cooker to ensure best results!

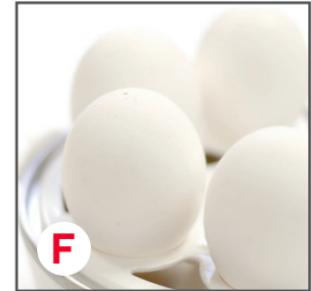

USING YOUR RAPID EGG COOKER

ATTENTION: Do not unplug the unit while cooking. If you unplug the unit while cooking, it will still be turned on when you plug it back in. If the unit does not detect water on the Heating Plate, it will automatically shut off and reset itself in a few seconds.

BOILING EGGS

- 1 Make sure the Rapid Egg Cooker is unplugged before starting. Pierce the larger end of each egg with the attached Pin at the bottom of the Measuring Cup (**photo A**).
- 2 Use the Measuring Cup to pour the appropriate corresponding amount of cold water into the Heating Plate (**photo B**).
- 3 Attach the Boiling Tray Handle to the Boiling Tray (**photo C**), and place the Boiling Tray on the Heating Plate. Place an egg in each designated spot in the Boiling Tray. Make sure that the holes in the larger end of the eggs are pointed upwards.

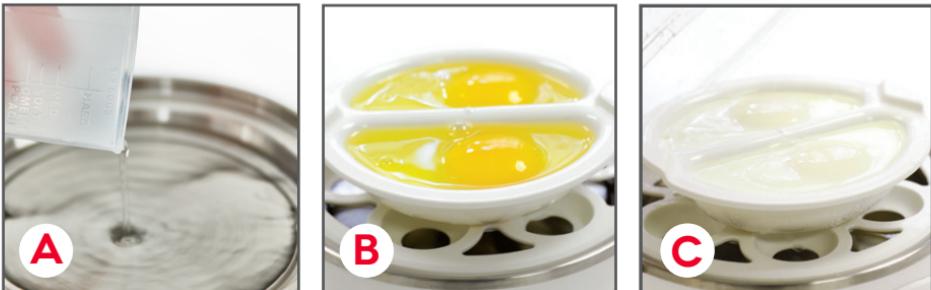

WARNING: Do not lock the Lid when using your Rapid Egg Cooker as this may cause injury when removing the Lid once the buzzer sounds.

- 4 Cover with the Lid and plug in the Rapid Egg Cooker. Press the Power Button to start cooking (**photo D**). The Indicator Light will turn on.
- 5 When the eggs are finished cooking, a chime will sound. Press the power switch to silence the chime (**photo E**). Actual cooking time will depend on number of eggs and desired style.
- 6 Uncover Lid by using the Lid Handle and remove eggs with heat-resistant tongs. Do not touch the parts with bare hands as they will be hot!

Soak the eggs in ice water or run them under cold water immediately after removing them from the Rapid Egg Cooker to stop the cooking process—also makes peeling easier!

POACHING EGGS

- 1 Fill the Measuring Cup with cold water until it reaches the Omelette/Poached line. Pour the water into the Heating Plate (**photo A**). Place the Boiling Tray on top of the Heating Plate.
- 2 Lightly grease the Poaching Tray with cooking oil.. Always place the Omelette Bowl or Poaching Tray on top of the Boiling Tray and never directly on the Heating Plate.
- 3 Break an egg into each section of the Poaching Tray (**photo B**). Cover with the Lid and plug in the Rapid Egg Cooker. Press the Power Button. A chime will sound to alert you the eggs are ready (**photo C**). Switch the Egg Cooker off and remove eggs immediately to avoid overcooking.

WARNING: Do not lock the Lid when using your Rapid Egg Cooker as this may cause injury when removing the Lid once the buzzer sounds.

USING THE OMELETTE BOWL

- 1 Fill the Measuring Cup with cold water to the Poached/Omelette Line. Pour cold water onto the Heating Plate (**photo A**).
- 2 Lightly grease the Omelette Bowl with cooking oil. Always place the Omelette Bowl on top of the Boiling Tray and never directly on the Heating Plate. Pour whisked eggs into the Omelette Bowl (**photo B**).
- 3 Cover with the Lid and plug in the Rapid Egg Cooker. Press the Power Button. When the chime sounds, your eggs will be ready to eat (**photo C**)! It is normal for the eggs to expand while cooking. They will contract once the Lid has been opened. Remove your omelette with a spatula.

CHEF TIP! For a drier omelette, leave the eggs in the Rapid Egg Cooker for an extra two minutes.

CLEANING THE HEATING PLATE

- Unplug the Rapid Egg Cooker prior to cleaning or moving it.
- Allow the Egg Cooker to cool completely prior to cleaning.
- Wash the Rapid Egg Cooker Accessories and Lid with warm, soapy water.
- Wipe down the Body and Heating Plate with a wet cloth.
- Dry all parts thoroughly. When storing, place the accessories on the Heating Plate and secure with the Lid.

CAUTION: During and after use the appliance will be hot.
Do not attempt to clean your Egg Cooker until the appliance has cooled. Do not submerge the Body in water or other liquids.
The Body of the appliance is NOT dishwasher safe.
