PARTS & FEATURES

USING YOUR MINI WAFFLE BOWL MAKER

- 1 Place the Mini Waffle Bowl Maker on a stable surface (**photo A**). Plug in the appliance. The Heating Light will turn on to signal that the appliance is heating up (**photo B**). When the Heating Light turns off, this means that the temperatures of both Cooking Surfaces are sufficiently ready for cooking. The preheating is complete.

During the cooking process, the heating element will automatically turn on and off to regulate the temperature and ensure that the Cooking Surface does not get too hot or cold. When this occurs, the Indicator Light turns on and off.

- 2 While the appliance is preheating, prepare your waffle recipe. You can also prepare the recipe ahead of time, as the appliance preheats quickly.

USING YOUR MINI WAFFLE BOWL MAKER

- 3** Open the cover of the Mini Waffle Bowl Maker by using the handle on the front of the appliance (**photo C**).

WARNING: Be sure NOT to grab the Mini Waffle Bowl Maker from the top or sides, as it will be hot. Open by using the Cover Handle only.

- 4** Pour 3 tbsp of batter into the Lower Cooking Surface of the appliance. The recommended amount of batter for each waffle bowl is about 3 tbsp to $\frac{1}{4}$ cup. Ensure that you do not add too much batter, as the waffle bowl will expand while cooking and may overflow if excess batter is used. Gently close the Cover (**photo D**).

ATTENTION: The Mini Waffle Bowl Maker will get very hot during use. DO NOT touch the Cover of the appliance during preheating and throughout the cooking process.
