## PARTS & FEATURES

## SETTING UP THE CITRUS JUICER

- 1** Uncoil the Power Cable from the Cable Wrap to the desired length. Place the Base on a dry and solid surface (**Photo A**).
- 2** Place the Juice Container onto the Base with the handle above the arrow. Turn the Juice Container clockwise until it locks into place (**photo B**).

## SETTING UP THE CITRUS JUICER

- 3** Place the Upper Screen on the Bottom Screen so that the Screen Opener sticks through the opening and the screens lock into place (**photo C**).
- 4** Place the assembled Screen on the Juice Container so that the handles fit exactly one on top of the other (**photo D**).

## SETTING UP THE CITRUS JUICER

- 5 Place the Small Juicer Cone on the Drive Axle (**Photo E**). In the process, the Small Juicer Cone must lock into the Screen. For large citrus fruits (e.g. oranges, grapefruit), place the Large Juicer Cone on the Small Juicer Cone so that the wings of the Small Juicer Cone fit into the recesses of the Large Juicer Cone (**Photo F**).
- 6 Plug the main cord into a matching wall outlet.

**NOTE:** The power cable can be easily wound up in the Cable Wrap.

## USING THE CITRUS JUICER

Remember to always use fresh, washed fruit and ensure that nothing is on the Screens or in the Citrus Juicer before operating.

- Prior to juicing, cut citrus fruits in half.
- To begin juicing, apply gentle pressure on the half of the citrus fruit when pressing it onto the Juicer Cone, but avoid using too much force. The Juicer Cone will start to rotate and the juice will flow into the Juice Container. Do not let the Juice Container get filled past the 600 milliliter mark. Once it reaches that point, empty the Juice Container into serving glasses.
- To stop juicing, release the Juicer Cone. As soon as it is released, the Citrus Juicer will stop juicing.
- When juicing is complete, unplug the Citrus Juicer first before removing the Juice Container from the Base.
- To remove the Juice Container, turn it counterclockwise and lift it from the Base. Pour out the juice from the container. It is important to clean the appliance immediately after each use to prevent the pulp from drying and sticking to the surface.

## USING THE CITRUS JUICER

### TIPS AND TRICKS

The pulp content in juice can be adjusted by utilizing the Screen Opener. To produce juice with high pulp, adjust the Screen Opener to the large dot mark to allow for a wider opening in the Screen.

- In order to maximize juice yield, the Juicer Cone will reverse rotation after multiple starts and stops.
- If the Juicer Cone is not turning, check for fruit pieces or seeds that might be stuck between the Juicer Cone and the Screen and remove them.

**NOTE:** Make sure to clean the Citrus Juicer immediately after each use to prevent the pulp from drying and sticking to the surface.

**WARNING:** Do not submerge the Base, Power Cable, and Main Plug in water or any liquid. The Base is not dishwasher safe.

## DISASSEMBLY

1. Unplug the Citrus Juicer before disassembling or cleaning.
2. Once unplugged, remove the Lid, Juicer Cones, and Screens.
3. Apply slight pressure on the Screen Opener to disassemble.
4. Turn the Juice Container counterclockwise and lift from the Base.
5. Wipe the Base down with a damp cloth.
6. Wash all detachable accessories by hand. Clean the small cavity in the handle with an adequate amount of hot (not boiling) water.
7. Make sure to thoroughly dry all parts before reassembling the appliance and storing it.

## CLEANING

- The Base, Power Cable with Main Plug must NEVER be immersed in water or any other liquid.
- Never use boiling water to clean the Citrus Juicer.
