Zakarian by Dash Nonstick Cast Iron Cookware has a unique nonstick coating that is not like other cast iron products. Follow these tips to ensure the longevity of your product:

Do not season your Zakarian by Dash Cookware with oil, as you typically would with cast iron cookware. Doing so will damage the nonstick coating.

Avoid using extra virgin olive oil over high heat as it will burn and leave a thin carbonized layer on the surface.

Aerosol cooking spray should not be used on nonstick cast iron as it damages the coating and is difficult to remove.

Cooking over a high heat burner for prolonged periods may cause staining.

## Preheat with oil or butter

Use a small amount of oil or butter to lightly and evenly coat the inside surface each time you cook. Do not use aerosol cooking sprays. Allow the oil to heat for a minute before adding food. Never heat your cookware empty or dry as this can result in property damage or injury.

## Use low to medium heat

Use low to medium burner heat when cooking to avoid damage to the cookware or coating. Cooking over a high heat burner for prolonged periods may cause staining and/or an uneven distribution of heat.

Your cookware is oven-safe up to 500°F.

Use extreme caution when using the cookware on glass stovetops as this may scratch or damage the glass.

## Nonstick safe utensils only

Silicone, nylon, or wood utensils are recommended to protect the nonstick coating. Metal utensils may scratch the nonstick coating.

## Allow to cool

Always allow the cookware to cool before submerging into water or other liquids. Never put a hot pan on a cold surface such as a marble countertop. Use a trivet.

## GENERAL CLEANING

Your Cast Iron cookware is NOT dishwasher-safe.

Hand-washing with a soft towel or sponge in warm, soapy water is recommended to prolong the cookware's original appearance.

Always allow the cookware to cool before cleaning. Filling with cold water before cooling may damage the cookware.

Never use steel wool or abrasive cleaning pads, as these may scrape off the coating. Do not use harsh cleaners.

## CLEANING TOUGH STAINS AND BUILDUP

### SOAKING

Try soaking the cookware overnight in hot, soapy water. For really tough stains like barbecue sauce, mix ½ cup of dishwasher detergent with 2 cups of hot water. Let stand in the cookware overnight then rinse and wash thoroughly.

### SOLUTION

For some foods, simmering ½ cup of vinegar and scrubbing with a non-abrasive sponge will give better cleaning results. Do not use metal sponges or brushes.

### BUILDUP

To help clean any discoloration or oil buildup, clean with a solution of baking soda and warm water using a soft towel or sponge.
